West Virginia Arts

The artistic traditions and current practices from the heart of Appalachia - quilting, basket making, glass making, cooking, woodcarving, storytelling, musical instrument making and more - will be investigated through both field trips and artist visits, including hands-on activities.

Nature

Using both traditional materials and materials found in nature, students will explore the natural environment of mountains, rivers, jungles, forests and other diverse ecosystems. The use of wood, stone shells and other natural artifacts will be explored. Information about fauna, flora and geology will be given a context in an interdependent environmental history.
